WHAT IS ... FAITH COMMUNITY NURSING?

Faith Community Nursing

is the intentional integration of

faith with nursing

to meet the needs of the whole person

within a congregation

and its surrounding community.

Central to parish nursing is a belief

in the interrelationship of

body, mind and spirit.

Health

is not merely the absence of disease.

It is an individual and community

journey toward *wholeness* and *well-being*.

Parish nurses, as professional

colleagues of the church pastoral team,

focus on the whole person

as they promote physical wellness,

provide health education/screenings,

foster emotional health,

and nurture spiritual growth.
